Director (EIA)
Environmental Management & Assessment Division
Central Environmental Authority
104, Denzil Kobbekaduwa Mawatha,
Battharamulla.

Subject: Comments on Proposed Extension of Pipe borne Sewerage coverage for Dehiwala - Mt. Lavinia Municipal Council area.

This has reference to the letter no. 08/EIA/WW/04/2014 addressed to Director General of Road Development Authority dated 26.10.2017 regarding the above subject.

Our comments on the EIA report are listed below.

1. The proposed project will cross or use the Right of Way of several RDA roads and most of them have recently been rehabilitated and improved. Therefore before starting the project, Project proponent is requested to get the permission from Director General (DG) of Road Development Authority.
2. As identified in the Environment Impact Assessment Report, this project will damage the Road Surface and Road Furniture. Necessary traffic management measures should be in place during construction stage in order to minimize impacts to the traffic flow.
3. Prior approval to be taken from the relevant divisions of RDA regarding restatement of any damage road sections. Any such sections require to be reinstated back immediately after the work in these roads is completed.
